Art Unit: 1646

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Groups 1-14. Claims 1-4, 6, 8-9, drawn to a TNF antagonist comprising the amino acid sequence set forth in SEQ ID NO:9-22.

Groups 15-36. Claims 1-3, 5, 6, 8-9, drawn to a TNF agonist comprising the amino acid sequence set forth in SEQ ID NO:37-59.

Groups 37-50. Claim 10, drawn to a method of treating diseases caused by TNF by administration of a TNF antagonist comprising the amino acid sequence set forth in SEQ ID NO:9-22.

Groups 51-64. Claim 10, drawn to a method of preventing diseases caused by TNF by administration of a TNF antagonist comprising the amino acid sequence set forth in SEQ ID NO:9-22.

Art Unit: 1646

Groups 65-86. Claim 11, drawn to a method of treating diseases caused by TNF by administration of a TNF agonist comprising the amino acid sequence set forth in SEQ ID NO:37-59.

Groups 87-108. Claim 11, drawn to a method of preventing diseases caused by TNF by administration of a TNF agonist comprising the amino acid sequence set forth in SEQ ID NO:37-59.

2. The inventions listed as Groups 1-108 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: JP 7-285997 teaches an agonist to TNF-R1, the mutein having a substitution at position 86 from the N-terminus of the amino acid sequence set forth in SEQ ID NO:1. Thus the product of claim 1 lacks a special technical feature over the prior art as the reference teaches the product of claim 1 (Groups 15-36). The Groups thus lack unity of invention over the prior art.

3. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1646

application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).

Rejoinder Practice

4. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained.

Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double

Art Unit: 1646

patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
